2018-2019 Award Guidelines**
Updated 7.5.2018

Preface	
AOTF Mission and Vision	<p><i>Mission:</i> To advance the science of occupational therapy to support people's full participation in meaningful life activities.</p> <p><i>Vision:</i> We envision a vibrant science that builds knowledge to support effective, evidence-based occupational therapy.</p> <p><i>Research Goal:</i> To support initiatives that build research capacity and advance knowledge related to occupation, health, and well-being.</p>
Statement of Intent for Funding of Health Sciences Research	<p>The American Occupational Therapy Foundation (AOTF) awards Health Sciences Research grants as part of its mission to advance the science of occupational therapy to support people's full participation in meaningful life activities. The purpose of this grant program is to develop preliminary evidence on OT services as well as provide pilot data for subsequent larger research projects. The goal of these studies is to further enhance the evidence base for OT HSR by asking clinically and policy relevant questions that advance the delivery of OT.</p>
Objectives	<p>The objectives of the AOTF Health Services Research grant include:</p> <ul style="list-style-type: none"> • To examine how OT services are organized and delivered within the healthcare system. • To explore client access to OT services. • To determine how to optimize client and provider behaviors with evidenced-based tools to foster delivery of high quality care. • To study the impact of policies on OT delivery and quality. • To align with future funding priorities and intended sources of funding. • Cultivate interdisciplinary research teams. • Include underserved and diverse populations in research.

**AOTF Health Services Research Grant
2018-2019 Award Guidelines**
Updated 7.5.2018

<p>AOTF Research Priorities</p>	<p>AOTF Research Priorities:</p> <ul style="list-style-type: none"> • Health behaviors to prevent and manage chronic conditions • Functional cognition • Safety and injury prevention in home, clinical and community settings • Technology and environmental supports in home and community • Development and transitions for individuals and families • Emotional and physiological influences • Family and caregiver needs • Health care experience: access, care coordination, utilization
<p>Priority Areas of OT-related Health Sciences Research Topics</p>	<p>Priority areas include:</p> <ul style="list-style-type: none"> • Access and care delivery in acute, post-acute, and outpatient OT services. • Access and care delivery in school systems under Medicaid. • Access and care delivery within the health system. • Costs and Care delivery. • Impact of health policy changes on OT care delivery.
<p>Approaches for the Health Sciences Research Grant</p>	<p>Approaches that lay the necessary groundwork for larger studies are:</p> <ul style="list-style-type: none"> • Pilot studies • Feasibility studies <p>See definitions of approaches in the RFA for the AOTF HSR on the AOTF website.</p>

**AOTF Health Services Research Grant
2018-2019 Award Guidelines**
Updated 7.5.2018

Funding Award Information	
Grant Options	<p>HSR Pilot Study Option #1: Includes pilot studies examining an occupational therapy related question using data from administrative or healthcare dataset(s) (e.g. Medicare Administrative data, Health System Electronic Medical records).</p> <p>Funding required: \$100,000 per grant.</p> <p>HSR Pilot Study Option #2: Included pilot studies examining a rehabilitation question using data from publicly available datasets (e.g., Health and Retirement Survey, National Health and Aging Trends Study, National Health and Nutrition Examination Survey, LTCFocus).</p> <p>Funding Required: \$50,000 per grant.</p>
Grant Period	Funds will be released on a payment schedule identified by AOTF. The annual grant cycle year begins on July 1.
Use of Funds	<p>HSR Pilot Study Option #1: Funding may be used to cover full-time equivalent for PI and other key personnel, data acquisition costs, software for data analysis, consultant fees, and dissemination activities. These studies may run up to two years given the time necessary to purchase administrative data, clean the data, and conduct analysis before manuscript development.</p> <p>HSR Pilot Study Option #2: Funding may be used to cover full-time equivalent for PI and other key personnel for work or statistical consulting. Data sets for these studies are free and thus would not require purchasing of data or paying for health systems IT personnel. These studies may run up to one year.</p>
Areas of Study	AOTF will identify priority areas for Health Services Research grants on an annual basis. The number of grants to be awarded for Health Services Research projects will be determined on an annual basis.
Other Support	<p>The Foundation would prefer that proposed studies have obtained matching funds or in-kind services.</p> <p>All sources of support for the proposed project must be identified in the “Other Support” in the Financial Support section of on-line application.</p>

**AOTF Health Services Research Grant
2018-2019 Award Guidelines
Updated 7.5.2018**

Limitations of Use	<p>Indirect costs are not to exceed 10% of direct costs.</p> <p>No funds will be approved to finance cost overruns or deficits on existing projects or to finance projects already in progress.</p> <p>No funds will be approved to finance tuition.</p> <p>Funds are not to be used for mentor salary or expenses.</p> <p>Support for purchase of major pieces of permanent equipment is limited to 20% or less of the total award.</p>
Payment of Funds	<p>Funds will be sent directly to a designated official of the U.S. sponsoring organization/institution for administration through its financial office. Funds are only available for research done at U.S. non-profit institutions.</p>
Fringe Rate	<p>The Sponsoring Organization/Institution must indicate at the time of application the fringe benefit rate, if any, that shall be applied to the grant.</p>
Schedule of Payments	<p>Funding will be delivered in two payments of 50%; the first will be sent at the beginning of the grant, the second half of the grant will be sent when AOTF receives the Progress Report halfway through the term of the grant.</p>
Deviation in Payment Schedule	<p>Any deviation from this schedule must be requested in the application and approved in writing by the Foundation prior to the beginning of the grant period of performance.</p>
Progress Report	<p>The second payment will be contingent upon receipt of a Progress Report(s) half way in the term of the grant. The Progress Report must indicate satisfactory progress has been made in completing work on the proposed timetable. Failure to supply Progress Report(s) will result in termination of the grant.</p>

**AOTF Health Services Research Grant
2018-2019 Award Guidelines
Updated 7.5.2018**

Eligibility of Principal Investigator, Research Mentor, and Applicant Organization	
Eligibility of Principal Investigator	<p>Research awards are made only to eligible principal investigators (PI). Eligibility of the principal investigator must be maintained during the funding period. These non-negotiable eligibility criteria include:</p> <p>General Personal Criteria</p> <ul style="list-style-type: none"> • A terminal research degree (or doctorate with advanced research training). • U.S. citizen or non-citizen national of the United States OR admitted for permanent residence OR applied for permanent residence. (For non-citizens, the applicant organization must have policies in place to determine whether residence status or visa status will allow completion of the research.)* • Employed by a U.S. domestic, public or private, non-profit organization/institution that is eligible to receive Foundation research grants. The sponsoring organization/institution assures that they will be accountable for the funds and provide the PI with adequate institutional support, equipment, and other physical resources necessary to conduct the research and contribute to probability of success. ** • A credentialed occupational therapist with a faculty appointment or an equivalent research position OR a non-OT investigator with an OT having a major role in the research team. • No conflicts of interest that result in ineligibility, including: <ul style="list-style-type: none"> ○ AOTF or AOTA Board member or staff ○ AOTF Scientific Advisory Council member ○ Board or staff member of HSR sponsor <p>Research and Proposed Project Criteria</p> <ul style="list-style-type: none"> • A track record of achievements and career goals related to the proposed project that includes peer-reviewed publications. • Does NOT currently have any substantial extramural research awards (e.g. RO1, PCORI, Research Program Project Grant, Veterans Administration Merit Award, and Field-Initiated Project). Typically, the PI will have a funding history associated with early stage, emerging, or early midcareer investigators that may include small research grants and training-related or mentored career awards. • A commitment from an experienced research mentor who has an established record of substantial extramural funding, peer-reviewed publications and supervision and research mentoring experience. <p>* The Foundation expects applicant organizations to have policies in place for non-citizens. If a grant is awarded and the principal investigator's visa will not allow a long enough time to complete the project, the Foundation may terminate the grant. The Foundation reserves the right to impose specific citizenship requirement on specific grant programs as communicated in the eligibility criteria. The applicant may be required to provide documentation of proof of eligibility; ordinarily the authorizing organization signature on the application certifies that the applicant is eligible to apply for and receive an award.</p>

**AOTF Health Services Research Grant
2018-2019 Award Guidelines**
Updated 7.5.2018

	<p>** The Foundation may consider factors relating to the applicant organization and the principal investigator's ability to responsibly handle and account for Foundation funds and to carry out the project. These factors include the applicant's intended role in the project, the location where the project will be performed, the role of the principal investigator in the project, and the principal investigator's employment status.</p> <p>The principal investigator's responsibilities include:</p> <ul style="list-style-type: none"> • Fiscal accountability for funds awarded. • Direct oversight of the scientific process with accountability for the quality of the study as conducted. • Timely submission of all progress and final reports to the Foundation. • Dissemination of results of the study through peer-reviewed publications and public presentation. <p>Thus, the principal investigator must have a substantive role in the project and not simply serve as a conduit for another investigator or organization.</p>
<p>Eligibility of Research Mentor</p>	<p>The research mentor must have an established record of substantial extramural grant funding, peer-reviewed publications, and supervision and mentoring of researchers.</p>
<p>Eligibility of Applicant Organization</p>	<p>The applicant organization must be a U.S. domestic, public or private, non-profit organization/institution that is eligible to receive Foundation research grants.</p> <p>The applicant organization assures that they will be accountable for the performance of the approved project and the appropriate expenditure of the funds.</p> <p>The applicant organization will provide the principal investigator with adequate institutional support, equipment, and other physical resources necessary to conduct the research and contribute to probability of success.</p> <p>The applicant organization may not have real or perceived conflicts of commitment or an overlap in mission with the American Occupational Therapy Foundation.</p>
<p>Ineligible Requests</p>	<p>The following requests are ineligible for the AOTF Health Sciences Research grant:</p> <ul style="list-style-type: none"> • Projects to be completed in fulfillment of requirements for an academic degree. • Projects sponsored by an organization or institution outside the United States. • Projects that include expenses or debts incurred before the award date of a grant.

**AOTF Health Services Research Grant
2018-2019 Award Guidelines**
Updated 7.5.2018

Reporting Requirements	
Reporting for Grant Awards	Progress and final reports must be submitted to the Foundation following the guidelines described below. Failure to submit a report by the stated deadline will delay continued support or jeopardize future support by the Foundation. (If funds are to be paid on an alternate payment schedule, the reporting schedule will be adjusted accordingly.)
Progress Report	<p>The principal investigator must e-mail a Progress Report to AOTF. A Progress Report is due 15 days before the second payment is scheduled. A brief Progress Report shall include:</p> <ul style="list-style-type: none"> • a summary of work completed to date, • discussion of major problems (if any) encountered and the plan to remedy the problems; • an explanation and justification for any deviation from the original plan of action; and • an explanation of any proposed changes to the plan.
Final Report	<p>The principal investigator must submit a Final Report to the Foundation within thirty (30) days of completion of the grant period. The Final Report should not exceed five (5) pages. It must include:</p> <ul style="list-style-type: none"> • Accounting of Expenditures: a detailed account of expenditures from the sponsoring institution (including both Foundation and other sources). Institution must return any unused fund of \$500 and over. • Description of work completed during the course of the research • explanation of any changes to the original plan • Findings or results from the project • Plans for future research projects and funding related to the study • Plans for dissemination of information related to the study • Abstract: The principal investigator must also submit an abstract with the following information. <ol style="list-style-type: none"> 1. Updated Project Summary in Lay Language: An <i>updated</i> description of the project for dissemination to the public that includes broad, long-term objectives and specific aims, design, methods, project results/findings and how the project relates to occupational therapy and the Intervention Research Grant objectives. The summary should be understandable when read separate from the Application and Final Report. (Avoid describing supporting literature and past projects and use of the first person.) 2. Grants: Summarize any grants related to the project that have been submitted or awarded, including: the funding source and opportunity, title of research proposal, date, total budget, funding status. Include any future plans for grant applications.

**AOTF Health Services Research Grant
2018-2019 Award Guidelines**
Updated 7.5.2018

	<p>3. Publications/Abstracts, Presentations, Press Releases: Submit summary information of dissemination activities that have been submitted or completed, including publications/abstracts, presentations, press releases. See Post-Grant Summary Information for details.</p> <ul style="list-style-type: none">○ Accepted Presentations: Provide summary information on any accepted presentations for dissemination to stakeholders in AOTF communications. <p>4. Surveys, Measures: Summarize any survey instruments or measures developed for the project.</p>

**AOTF Health Services Research Grant
2018-2019 Award Guidelines
Updated 7.5.2018**

Research Integrity	
Research Integrity	<p>The Foundation expects that all grant personnel will adhere to the highest ethical standards and compliance with regard to responsible conduct and integrity in scientific research.</p> <p>Integrity of the individual investigator requires:</p> <ul style="list-style-type: none"> • Intellectual honesty in proposing, performing, and reporting research • Accuracy in representing contributions to research proposals and reports • Fairness in peer reviews • Collegiality in scientific interactions, including communications and sharing of resources • Transparency in conflicts of interests or potential conflicts of interest • Protection of human subjects in the conduct of research • Humane care of animals in the conduct of research • Adherence to the mutual responsibilities between investigators and their research teams <p>The research institution supports integrity by efforts to:</p> <ul style="list-style-type: none"> • Provide leadership in support of responsible conduct of research • Encourage respect for everyone involved in the research enterprise • Promote productive interactions between trainees and mentors • Advocate adherence to the rules regarding all aspects of the conduct of research, especially research involving human subjects and animals • Anticipate, reveal, and manage individual and institutional conflicts of interest • Arrange timely and thorough inquiries and investigations of allegations of scientific misconduct and apply appropriate sanctions • Offer educational opportunities pertaining to integrity in the conduct of research • Monitor and evaluate the institutional environment supporting integrity in the conduct of research and use this knowledge for continuous quality improvement <p>Institute of Medicine (US). Committee on Assessing Integrity in Research Environments, & United States. Office of the Assistant Secretary for Health. Office of Research Integrity. (2002). <i>Integrity in scientific research: Creating an environment that promotes responsible conduct</i>. National Academies Press.</p>

2018-2019 Award Guidelines**
Updated 7.5.2018

<p>Submission of Similar Applications</p>	<p>The following submissions will not be accepted:</p> <ul style="list-style-type: none"> • applications with essentially the same research focus from the same applicant organization • identical or essentially identical grant applications submitted by different applicant organizations • more than one application from the same principal investigator or co-investigator • identical or essentially identical grant applications submitted to another funding agency during the same grant cycle as AOTF <p>Applicant organizations should ascertain and assure that the materials they are submitting on behalf of the principal investigator are the original work of the principal investigator and have not been used elsewhere in the preparation and submission of a similar grant application. The scientific review committee will be able to easily identify multiple grant applications for essentially the same project. In these cases, the application(s) may not be reviewed.</p>
--	--

**AOTF Health Services Research Grant
2018-2019 Award Guidelines**
Updated 7.5.2018

Approvals and Assurances	
Human Subjects	<p>If data is to be collected on human subjects, or if data used in the project contains identifiable private information that can be linked to human subjects, the plan must include specific procedures for review of the protocol and securing informed consent of subjects in compliance with federal policy on protection of human subjects.</p> <p>IRB Approval. Not all HSR research will require an IRB. If an IRB is required, proof of IRB approval is not required at the time of application. If your project is awarded, the first award payment will not be issued until proof of IRB approval is submitted to the Foundation. It must be on the sponsoring institution’s letterhead and signed by the appropriate institution official. If the proposed project has more than one site, IRB approval or exemption must be obtained for every site in the project.</p> <p>Human Subjects Assurance. The institution sponsoring the project’s research must be covered by an assurance agreement indicating compliance with Department of Health and Human Services (DHHS) regulations governing the protection of human subjects.</p> <p>Human Subjects Research Training. Not all HSR research requires Human Subjects Research Training. If the HSR research does require the training, the principal investigator and all key personnel involved in the conduct of the study must provide certificates demonstrating completion of a human subjects’ protection-training course. The training must be current according to the dates listed on the certificate. The Foundation will <i>not</i> accept a letter in lieu of a certificate indicating that a human subjects protection training course has been taken.</p> <p>HIPAA. Standards for Privacy of Individually Identifiable Health Information, the “Privacy Rule,” is a federal regulation under the Health Insurance Portability and Accountability Act (HIPAA) of 1996 that governs the protection of individually identifiable health information from covered entities through collaborative or contractual agreements. Decisions about whether and how to implement the Privacy rule reside with the researcher and his/her institution.</p>
Vertebrate Experimental Animals	<p>If vertebrate experimental animals are involved in the study, the plan must include specific procedures for review of the protocol in compliance with federal policy on the humane handling of animal subjects.</p> <p>IACUC Approval. The institution’s Animal Care Use Committee (IACUC) must have approved or given a waiver for the project.</p> <p>Animal Welfare Assurance. The institution sponsoring the research must be covered by an assurance agreement indicating compliance with regulations governing the protection of animals.</p>

**AOTF Health Services Research Grant
2018-2019 Award Guidelines**
Updated 7.5.2018

Changes in the Research Project	
Changes to the Research Plan	<p>The principal investigator must obtain written approval from the Foundation before making any substantial change in the plan of action, timetable for completion (including no-cost extensions), acquisition of subjects, etc. Requests for changes to the plan must be made in writing. The Foundation shall have thirty (30) days to review such requests and respond in writing to the principal investigator. If the request is made less than thirty (30) days prior to the next scheduled payment, the monies may be held until approval of any changes is given.</p>
Changes to the Budget	<p>The principal investigator must obtain written approval from the Foundation before making any substantial change in the budget. The Foundation shall have thirty (30) days to review any request for approval of a revised budget. The Foundation may approve or not approve changes at its discretion. If the request is made less than thirty (30) days prior to the next scheduled payment, the monies may be held until approval of any changes is given.</p> <p>Less than 20%: The Foundation does not require pre-approval of a departure from budgeted amounts as long as the departure does not exceed twenty per cent (20%) in any line item. However, any departure from the original budget must be explained fully in the progress and yearly reports.</p> <p>Greater than 20%: Transfers between line item in excess of twenty per cent (20%) and requests for expenditures in categories not initially included in the approved budget may be interpreted as representing changes in the overall plan of action. Accordingly, prior Foundation approval is required for all changes in line items of greater than 20%.</p>
Changes in Co-Investigators, Other Key Personnel, or Research Program	<p>The principal investigator must notify the Foundation upon becoming aware of any changes or pending changes that may prevent accomplishment or substantially alter the goals and objectives of the research program. Such notice must be received by the Foundation within five (5) days of the principal investigator's becoming aware of any such change or pending change. The Foundation may request additional information from which a decision to continue or to terminate the research grant can be made. The Foundation, in its sole discretion, shall determine whether the change jeopardizes the principal investigator's ability to complete the research program and whether funding of the project shall continue. In cases of early termination, the principal investigator shall be notified by the Foundation in writing sixty (60) days prior to the termination of the grant.</p>

**AOTF Health Services Research Grant
2018-2019 Award Guidelines**
Updated 7.5.2018

<p>Non-Compliance</p>	<p>Failure on the part of the principal investigator or applicant organization to comply with the policies governing the grant may be grounds for early termination of the grant and/or denial of any future consideration for funding from the Foundation.</p> <p>Should the principal investigator encounter problems during the grant period, the Foundation may request additional information from which a decision to continue or to terminate the grant can be made. In cases of early termination of the grant, the principal investigator and applicant organization will be notified in writing sixty (60) days before the grant is terminated.</p>
<p>Extension of Research Project</p>	<p>A written request for extension of reporting deadlines with no additional funding (a no-cost extension) must outline in detail the reasons for the request. The request must be received by the Foundation thirty days (30) prior to the expiration of the original grant period of performance.</p>

**AOTF Health Services Research Grant
2018-2019 Award Guidelines
Updated 7.5.2018**

Credit Acknowledgements and Post-Grant Requirements	
Credit Acknowledgements	<p>Future funding requests to AOTF from the Applicant Organization and Principal Investigator will be denied if there is no compliance with requirements for credit acknowledgement and post-grant summary information on research program activities.</p> <p>Support provided by the AOTF Health Services Research grant must be reflected in all publications, presentations, and press releases related to the funded research. An appropriate credit line is:</p> <p>“This research has been supported in full/part with an AOTF Health Services Research grant (AOTF2019HSR##) funded by the American Occupational Therapy Foundation. “</p>
Post-Grant Summary Information on Research Program Activities	<p>For a period of five (5) years following the completion of the project and submission of the final report, the Principal Investigator is required to submit annual summary information to the Foundation on activities related to the funded research project, including:</p> <ul style="list-style-type: none"> • Funding and grants • Publications • Presentations • Press releases <p>The Foundation may use the grant abstract, grant reports, and post-grant summary information for media announcements and other communications to promote public awareness and demonstrate accountability for funding awards.</p>
Future Funding and Grants	<ul style="list-style-type: none"> • Future funding and grants do not require Foundation approval. • The Applicant Organization/Institution or Principal Investigator shall regularly notify the Foundation of any future grant activities related to the research program, including: <ul style="list-style-type: none"> ○ Funding Source and Opportunity ○ Title of Research Proposal ○ Date ○ Total Budget ○ Funding status • For a period of five (5) years following the completion of the project and submission of the final report, upon request, the Principal Investigator is required to submit information to the Foundation electronically regarding all grant submissions and funding awards related to the funded research project.

**AOTF Health Services Research Grant
2018-2019 Award Guidelines**
Updated 7.5.2018

<p>Publications</p>	<ul style="list-style-type: none"> • Publications and abstracts do not require Foundation approval. • The Sponsoring Organization/Institution or Principal Investigator shall notify the Foundation of the intention to release for publication the results of the Foundation-funded research. • One (1) copy of all published papers and/or abstracts relating to the funded study should be sent to the Foundation electronically immediately upon publication. • For a period of five (5) years following the completion of the project and submission of the final report, upon request, the Principal Investigator is required to submit information to the Foundation electronically regarding all submitted, in press or published papers; and submitted or accepted abstracts related to the funded research project.
<p>Presentations</p>	<ul style="list-style-type: none"> • Presentations do not require Foundation approval. • The Sponsoring Organization/Institution or Principal Investigator will provide the Foundation advanced notification of accepted presentations for the research project. Timely submission of summary information on accepted presentations may be disseminated as an advanced notice in AOTF communications to stakeholders. • The Principal Investigator is expected to submit results from the completed project to AOTA's Annual Conference for presentation within two years after completion of the project. • For a period of five (5) years following the completion of the project and submission of the final report, upon request, the Principal Investigator is required to submit information to the Foundation electronically regarding all presentations related to the funded research project.
<p>Press Releases</p>	<ul style="list-style-type: none"> • Press releases prepared by the principal investigator or applicant organization do not require Foundation approval. • For a period of five (5) years following completion of the study and submission of the final report, the Principal Investigator shall provide the Foundation with an electronic copy of all media announcements related to the funded research project.
<p>Surveys and Measures</p>	<ul style="list-style-type: none"> • Surveys and measures developed do not require Foundation approval. • For a period of five (5) years following the completion of the project and submission of the final report, upon request, the Principal Investigator is required to submit information to the Foundation electronically regarding development of surveys or measures related to the funded research project.

**AOTF Health Services Research Grant
2018-2019 Award Guidelines**
Updated 7.5.2018

Royalties, Patents, Equipment	
Royalties/Patent Policy	<p>By accepting a grant, the PI and sponsoring organization agree that they will inform AOTF (in writing within thirty days of filing) of any royalties, patent or invention resulting from the Health Services Research award, and forward a copy of institutional policies governing third party royalty agreements. The AOTF and the Sponsoring Institution or Principal Investigator may enter into a written agreement (the Revenue Sharing Agreement) that defines the AOTF's participation in sharing net royalty income derived from Health Services Research inventions.</p> <p>Title: Title to any Health Services Research invention shall belong to the Sponsoring Organization/Institution or Principal Investigator and not to the Foundation.</p> <p>Government Agencies: For any Health Research Services invention that is made with joint support of the AOTF and any agency or department of the United States Government, the AOTF may defer to the patent policy of that agency or department.</p>
Ownership of Equipment	<p>Title to all apparatus, equipment, material, instruments, and products purchased, built, prepared or fabricated by an organization with the Foundation research grant funds will normally vest in the grantee, with the understanding that such equipment will remain in use for the specific project for which it was obtained.</p>

**AOTF Health Services Research Grant
2018-2019 Award Guidelines
Updated 7.5.2018**

Criteria for Evaluation for Application	
Grant Review Criteria	<p>The Foundation's Scientific Review Group (SRG) has responsibility for reviewing applications for the AOTF Health Services Research grant and recommending to the Foundation which proposal(s), if any, will qualify for funding. The SRG, in evaluating applications, will take into account the following:</p> <ul style="list-style-type: none"> • Overall Impact/Priority: The overall impact/priority score is the key review outcome and the main basis for a funding decision by AOTF. The score reflects reviewers' judgment of the extent to which a project can make an impact, has relevance and importance to the AOTF mission and HSR program, and has likelihood of success. The overall impact/priority score reflects all the criteria, but it does not represent a mathematical sum of the parts. • Significance: Does the project address an important problem or a critical barrier to progress in the field? If the aims of the project are achieved, how will scientific knowledge, technical capability, and/or clinical practice be improved? How will successful completion of the aims change the concepts, methods, technologies, treatments, services, or preventative interventions that drive this field? • Investigator(s): Are the PD/PIs, collaborators, and other researchers well suited to the project? If Early Stage Investigators or New Investigators, or in the early stages of independent careers, do they have appropriate experience and training? If established, have they demonstrated an ongoing record of accomplishments that have advanced their field(s)? If the project is collaborative or multi-PD/PI, do the investigators have complementary and integrated expertise; are their leadership approach, governance and organizational structure appropriate for the project? • Approach: Are the overall strategy, methodology, and analyses well-reasoned and appropriate to accomplish the specific aims of the project? Are potential problems, alternative strategies, and benchmarks for success presented? If the project is in the early stages of development, will the strategy establish feasibility and will particularly risky aspects be managed? <p>If the project involves clinical research, are the plans for 1) protection of human subjects from research risks, and 2) inclusion of minorities and members of both sexes/genders, as well as the inclusion of children, justified in terms of the scientific goals and research strategy proposed?</p>

**AOTF Health Services Research Grant
2018-2019 Award Guidelines**
Updated 7.5.2018

	<ul style="list-style-type: none">• Environment: Will the scientific environment in which the work will be done contribute to the probability of success? Are the institutional support, equipment and other physical resources available to the investigators adequate for the project proposed? Will the project benefit from unique features of the scientific environment, subject populations, or collaborative arrangements?• Evaluation Classification: The Scientific Review Group will review, evaluate, and classify all eligible applications into the following four categories:<ul style="list-style-type: none">○ Recommended for funding○ Not recommended for funding○ Not scored○ Ineligible per AOTF requirements and criteria• Completion of Project: The potential for successful completion of the project is a major consideration in awarding research grants.
